

Coding & Solution

Date	13 July 2026
Team ID	N/A
Project Name	FinRelief AI – AI Powered Debt Relief & Financial Recovery Platform
Maximum Marks	5 Marks

Coding & Solution

This section evaluates the quality and completeness of the implemented code and the overall solution. The submission demonstrates working functionality, clean code practices, and alignment with the defined requirements.

Instructions:

1. Ensure your code is well-structured, commented, and follows best practices for your chosen technology stack.
2. The solution should address the core problem statement and implement the key functional requirements.
3. Include all source files, configuration files, and setup instructions needed to run the application.
4. Attach or link to your code repository (e.g., GitHub) in the table below.

Solution Summary

Field	Details
Repository Link / URL	<a href="https://github.com/<team-org>/finrelief-ai">https://github.com/<team-org>/finrelief-ai (to be added by team lead)
Programming Language(s)	Python, JavaScript
Framework(s) Used	FastAPI, React.js, SQLAlchemy ORM
Key Features Implemented	Loan management, financial health dashboard, AI-powered settlement recommendation, Gemini-based negotiation letter generation, negotiation history log
Pending / Incomplete Features	Cloud deployment, multi-lender letter templates, proactive alert notifications
Setup / Run Instructions	Backend: pip install -r requirements.txt, then uvicorn main:app --reload. Frontend: npm install, then npm start. Configure the Gemini API key as an environment variable before running.

Code Quality Checklist

S.No	Criteria	Status (Yes / No)
1	Code is modular and organized into functions / classes	Yes
2	Meaningful variable and function names are used	Yes
3	Code includes comments / documentation where necessary	Yes
4	Error handling is implemented for critical operations	Yes
5	The application runs without critical errors	Yes
6	Code is committed to a version control repository	Yes

Additional Notes / Comments:

Core functionality — loan management, financial health scoring, and AI-based negotiation letter generation — is fully working end-to-end. Remaining work is limited to production deployment and expanding lender-specific templates.
