

## Communication

|                      |                                                                     |
|----------------------|---------------------------------------------------------------------|
| <b>Date</b>          | 13 July 2026                                                        |
| <b>Team ID</b>       | N/A                                                                 |
| <b>Project Name</b>  | FinRelief AI - AI Powered Debt Relief & Financial Recovery Platform |
| <b>Maximum Marks</b> | 1 Mark                                                              |

### Communication Plan:

Effective communication is essential for a successful project demonstration. This document outlines the communication strategy used within the team and with stakeholders throughout the project lifecycle, including how updates, issues, and feedback were managed.

| S.No | Communication Type     | Frequency    | GitHub + WhatsApp group        | All 5 team members       | Sync on tasks completed the previous day and blockers for today             |
|------|------------------------|--------------|--------------------------------|--------------------------|-----------------------------------------------------------------------------|
| 1    | Team Standup           | Daily        | Google Meet                    | All members + team lead  | Share loan/financial-engine/negotiation                                     |
| 2    | Progress Update        | Weekly       | WhatsApp group / GitHub Issues | Relevant module owner(s) | Flag and resolve backend/frontend bugs (e.g. the passlib/bcrypt and         |
| 3    | Issue / Bug Discussion | As Needed    | Google Meet                    | Team lead + members      | Walk through dashboard, settlement predictions, and negotiation letters for |
| 4    | Stakeholder Review     | Bi-Weekly    | Google Meet (screen share)     | All 5 team members       | Rehearse the end-to-end demo flow: register, add loan, view dashboard,      |
| 6    | Mentor Review          | As Scheduled | GitHub + Google Meet           | Mentor (once assigned)   | Present project status and get guidance on open items                       |
| 6    |                        |              |                                |                          |                                                                             |

### Communication Challenges & Resolutions:

| S.No | Coordinating schedules across 5 team members for stand-ups                            | Moved to a fixed daily time slot and used an async WhatsApp update for anyone who missed the live call                                     |
|------|---------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------|
| 1    | A passlib/bcrypt version conflict silently broke user registration during integration | Root-caused via server logs, switched to calling bcrypt directly instead of through passlib, and re-verified with a full register-to-login |
| 2    | Early settlement-recommendation numbers looked unrealistic (500%+ DTI ratios)         | Traced it to comparing total loan balance against monthly (not annual) income, fixed the ratio calculation, and re-validated against       |
| 3    |                                                                                       |                                                                                                                                            |
